OTHER EMPLOYMENT EXPERIENCE

Financial Software Consultant, SAP

Toronto, (April 2007 – August 2011)

- Created project budget estimates and LOEs for client services engagements
- Managed and led projects for clients such as EnXco (Palm Springs), RBTT (Trinidad), ScotiaBank (Toronto), and Desjardins (Montreal)
- Led project requirement sessions with client
- Led design and implementation of multi-dimensional business models for planning, forecasting, and budgeting systems which include complex reporting requirements
- Delivered software deployment, testing, support and training for client
- Facilitated technical and functional knowledge transfer sessions with client administrators and end users

Business Analyst, IBM Deutschland

Stuttgart, (January – May 2004, May -September 2005)

- Collected, analyzed, and structured requirements input for an internal web tools set
- Worked with project stakeholders to develop solutions which balanced business input and architectural feasibility
- Prepared and delivered presentations to management team and project stakeholders to support and prioritize features development
- Thought in terms of business concepts rather than jumping straight into solutions in order to develop functional requirements for approximately 20 features
- Developed process flow charts and UI screen designs

Research Assistant and Teacher, University of Guelph

Kemptville, (September 2004 – January 2005)

- Taught first and second year math and computer courses for the Fall 2004 term
- Wrote tests and test solutions according to the required curriculum
- Worked with students to provide understanding of mathematical concepts through practical examples that appealed to the agricultural audience
- Collected survey data, performed statistical analysis, wrote reports, and created presentations for three large agricultural/economical research projects
- Prepared LOIs and funding applications for various research projects
